

Bioclean Septic

Less Suction, Buildup & Clogging, Odor Control, More Efficient Wastewater Treatment in Imhoff & Septic Tanks

Your cost efficient bioaugmentation technology for sludge reduction & anaerobic pretreatment of wastewater

Malatech
water

Benefits of Bioclean Septic bioaugmentation:

- **Operational savings** by preventing messy drainage & treatment system clogs, costly downtime and major repairs.
- **Reduces Imhoff & septic tank pump-outs.**
- **Eliminates foul odors** emanating from the septic system.
- **Restores biologic health** of the septic systems naturally.
- **Biodegrades organic blockages** in drain field lines, gravel leach pits and porous stone pit walls.
- **Keeps septic lines and drain fields cleaner** with reduced carry over of undigested organic pollutants.
- **Easy application** makes it the simplest and cleanest way to reduce your Imhoff & septic tank waste and keep them working properly.
- **100% all-natural & biodegradable, non-GMO, non-toxic, non-hazardous product with long shelf life, Works effectively without introducing environmentally hazardous chemicals**

Product description:

Bioclean Septic is a natural biological product consisting specially selected enzyme producing microorganisms that are suspended in a dormant state. Once exposed to water they will activate and begin their normal life cycle. One gram of product contains various selectively adapted waste digesting microbes. We developed the product for the **cost-efficient optimization** of psychrophilic **anaerobic processes at households, municipalities, and industries.**

Bioclean Septic is a natural biological product consisting specially selected enzyme producing microorganisms that are suspended in a dormant state. Once exposed to water they will activate and begin their normal life cycle. One gram of product contains various selectively adapted waste digesting microbes. We developed the product for the **cost-efficient optimization** of psychrophilic **anaerobic processes at households, municipalities, and industries.**

The microbes in Bioclean Septic are specially selected to **digest the organic materials that clog up your septic system** and adversely affect the environment like: faecal matter, detergents, grease, fat, proteins, paper and starch. Bioclean Septic is unsurpassed as a safe, natural method for **digesting organic waste, eliminating odor and removing organic build-up from pipes, tanks and leach drains**. It helps ensure the optimum efficiency of your septic system. The cost of a regular weekly/monthly maintenance programme is a small price to pay to help to protect your septic system and your environment. Microbial digestion is the simplest and cleanest way to reduce your Imhoff or septic tank waste.

IMPORTANT INFORMATION!

Recommended daily dosages are guidelines only, for exact calculations and tech support do not hesitate to contact us!

Application of Bioclean Septic

Imhoff tanks:

25-50 grams of Bioclean Septic/week/m³ of tank volume. Dosage may vary depending on HRT.

Septic tanks:

Use 50 grams of Bioclean Septic per m³ tank volume twice a week for the 1st month, by flushing down the toilet, or through the sink. Then start the maintenance program by adding 50 grams/m³ tank volume/month.

For the prevention of clogging of drain lines at households:

Use 50 grams of Bioclean Septic at the selected plumbing outlet, and flush down the powder with low amount of tepid water. Repeat every 3-4 days. Preferably do it when the system is about to be left unused for several hours (nighttime).

Packaging information:

The product is available in 250-gram metal-wall bags, 60 bags make up 1 carton box which is the lowest unit for ordering.

Storage information & shelf life:

Keep the product in a cool and dry place below 30 Celsius. Avoid exposure to direct sunlight. Shelf life is 5 years from manufacturing date.
